

Art

The living range encapsulates ones dreams and aspirations using bespoke images tailor matched to individual tastes. As well as focusing on the décor or functionality of a particular room Art can be used to portray your children's progress in the artistic field, the family pet, your favourite football team, or any other topic of your choosing. The attached images are merely a guide to the variety of themes available.

Art

Our standard images include our waterfall range for the bathroom and our food and drink range for the kitchen. Again, like our other ranges, bespoke images to suit individual taste can be the object of choice. The interchangeable fronts also allow the use of coloured coordinated glass or mirrors to match splash backs in both the kitchen and bathroom. In these ranges we were very conscious of the limitations in space and specifically designed a corner mounted radiator to suit even the smallest room.

Art

Capture the moment of your child's first drawing, as your very own work of art, or choose your favourite photo to portray a special moment. Alternatively, your child's favourite toys, pet, or popstar can be reproduced. A major feature in the Art concept is having the acrylic or glass front panel cool to the touch, which is a particularly appropriate feature for your child's bedroom. Whatever you choose, for whatever age group, you can also be sure that the panel will be maintained in pristine condition with its easily wiped down surface.

Childrens Range

These designs are suitable for the following sizes RA-03, RA-04 and RA-05

Teddies on a Bench

Art

These works of art are used to portray to stunning effect a panoramic view of the customer's choosing. Normally in three panels, more can be added for greater artistic impact or higher heat output. The panels are mounted on radiators but can also be incorporated in the artwork using a blank panel without the radiator. Heat requirement will be the determining factor in this flexible approach to combining functionality with art.
