

[Old Skool] exclusive to radiator centre ltd

Old Skool Old Skool radiators look elegant and smart in both traditional and contemporary settings. This efficient range allows the architect or designer to provide highly versatile heating solutions without ever compromising on style – an asset anywhere. Old Skool is a stunning yet up-to-date contemporary styled radiator based on a truly traditional theme.

From one basic cylindrical column concept, the Old Skool rings a number of changes. Lighter than cast iron but with all its time honoured glamour. The stocked range of Old Skool spans the gap between contemporary and classic, equally at home in either application. Old Skool is available in 3 depths from 2 to 4 columns and 4 heights. It is fabricated from 25mm diameter tubes with a wall thickness of 1.2mm and 1.5mm headers.

- Nipped construction unique to this type of radiator, allows maximum flexibility in selection and sizing.
- Seated 'O' rings ensure simple leak free jointing every time.
- Optional 'insertable feet' give you the freedom to easily upgrade to 'with feet' specification when required.
- Also available in a stunning chrome finish on the 600 high 3 column version. (see page 3)
- For longer lengths a joining key is required (£100 deposit refundable upon return)
