

# [ Sanaplan ] STEEL

**Sanaplan** Manufactured from high quality steel, the innovative design of the Sanaplan eliminates all sharp edges and corners to create a visually muted and softened effect, especially suited to applications where safety and hygiene are paramount. The traditional column profiling of the Sanaplan perfectly complements both a modern environment and period refurbishment. The Sanaplan range offers seven models, from 280mm to 980mm in height.

**Specification**

Models available: 12 delivered fully assembled
